- Last Scout Window**
If there are previous scouting reports on the field, the window will indicate the days since the last report.
- Open Field Details**
Opens the field details window and also opens the action area to begin a scouting report.

GETTING STARTED

Where can I get the AgriSite app?

AgriSite is available for download from the iTunes App Store for the iPad, iPad mini.

How do I obtain a login (username) to use the app?

You will need an AgSync username with an active full account. You can call sales or support at AgSync to get an account. *AgSync lite users do not have access to the AgriSite app ordering function, as the app creates orders not scheduled tasks.*

How do I log out?

Click the map menu icon to open the user tools. Under the user tool icon you will find the logout area. Click the log out button at the top and you will be successfully logged out of the app.

What happens if I change the screen mode on the device? Portrait vs Landscape?

AgriSite is designed to work in both portrait and landscape mode.

MAP

What do the pins on the map stand for?

To activate pins, navigate to the sidebar by clicking the  icon. At the bottom of the screen click Recurring Problems. The window will load any recurring problems associated with the field.

Recurring Problems

Show on the field where recurring problems were noted.

How do I open the map menu?

Clicking the menu icon  will open the dropdown menu items. Re-clicking the icon will close the dropdown.

How do I zoom to my location?

With the map menu open, click the zoom icon. This will zoom the map to your GPS location.

How do I activate public &/or private annotations?

With the map menu open, click the layers icon. This will open the annotation options. Choose public or private or both. These stay active while you are logged into this session.

How can I keep the map from losing my location?

With the map menu open, click the location icon. This locks the map view to your location. If you move outside the map viewing area, the app will reposition to follow you. Unselect the locator to stop following.

How can I add weather layers to the map?

Clicking the weather widget  on the lower left side of the map will open the weather layers options. Click on a layer to enable it.

Layers available are: Radar, Current Temperature, Current Winds, Dew Point, Humidity. One layer can be chosen at a time and you can deactivate the layer by deselecting it.

FIELDS

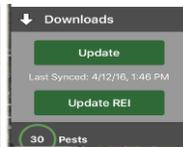

How do I find my fields?

The left side of the screen will list the fields in your account. These are listed by Field name, followed by Customer and Farm

How can I sync my fields?

Click  >>  >> Update

Clicking **Update** under **Downloads** will update the app to bring in any new fields that may have been added since the last sync time. This will also sync any new crops or pest that were added.

How to filter fields?

In the Field Sidebar click the filter icon .

Make the filter selections and then click >> **Done**.

Options to filter by are:

Account: If you have more than one account you can filter between or view them all.

Growers: Choose the grower fields you want to have load.

Farms: Choose the specific farm to view.

In Progress: Toggle this on and off to see fields that have Orders started. This functionality is only available to scouts and agronomists.

How do I search fields?

 Search

Type the search criteria in the search window, then click the Search button on the keyboard.

How can I view a field on the map?

Click the field open icon  on the field name on the list. This will choose the field and load the map with the corresponding field.

See the field details.

Click  on the field name on the list and the field will load on the map, and the Field Overview, Grower Overview, and Order Overview (if there are orders for the field), will load.

View grower details.

Click the field open icon  and the field will load on the map, and the Grower Overview will load. This will list the grower name, address and contact information. Clicking the email, phone or cell numbers will allow you to contact owner if applicable with your service.

View field Order details and status.

Click the field open icon  and the field will load on the map, and the Order Overview will load. This will only load **if** there are orders on the field. Scouts can see order status and review order details by clicking on the orders. Products labels can be downloaded if available.

How do I navigate to a field?

Load the map with the boundary by clicking on the field in the field listing. Click and hold down on the boundary, and a pop up window will appear containing the field details, along with navigate to field button. Clicking “navigate to” button will give turn by turn directions from your current GPS location to that specific field. To start the navigation click Start in right hand corner. To close the navigation mode click Close in lower left side corner.

What do the icons on the field lines stand for?

Insect present on last Order.

Days since last field scouting.

Field warning icon. Warns there is an REI present on the field.

How do I add a new grower, farm, or field?

- 1.) Click the add field icon  above the field list.
- 2.) Choose **Create Field** (Draw) or (GPS).
- 3.) Click on map to draw polygon.
- 4.) Choose Save  at bottom of screen.
- 5.) Choose Grower to associate Field to.
 - a.) Select Grower from list or to add a new grower choose the Add icon .
 - b.) Enter the Grower details.
 - c.) Click **Done**.
- 6.) Choose Farm to associate Field to.
 - a.) Select Farm from list or to add a new farm choose the Add icon .
 - b.) Enter the Farm details.
- 7.) Enter the name of the new field you created.
- 8.) Click **Next**, then click **Done**.

How do I add a new field via Draw or GPS?

You can add new fields in the AgriSite app.

Add a field via Draw:

- 9.) Click the add field icon  above the field list.
- 10.) Choose Create Field (Draw) or (GPS).
- 11.) Click on map to draw polygon.
- 12.) Double click to finish shape.
- 13.) Choose Save icon at bottom of screen.
- 14.) Choose the Customer and Farm name from list.
- 15.) Name new field.
- 16.) Update billable acres and add notes if necessary.
- 17.) Choose "Next"
- 18.) Populate Grower information.(if needed)
- 19.) Choose **Done** to Finish and Save.

Now you can create a new order for the new field.

Add a field via GPS:

- 1.) Click the add field icon  above the fields list.
- 2.) Choose Create Field (GPS)
- 3.) The app will track your gps location, as you move around the field.
- 4.) Click Save icon at bottom of the screen.
- 5.) Continue with [Steps 6 – 11](#) from Create Field via Draw (above)

How do I add a new zone?

To add a zone to an existing field, click the field in the My Fields list to load it on the map. Load the field details by clicking the open icon.

Click the Create Zone icon  (Draw or GPS).

Start drawing zone inside current field by clicking on the map.

Click the Save icon.

Populate the Zone name, Billable Acres and Notes.

Choose Save.

You can now create an order for this zone.

How do I find zone(s) for a field?

Click the Field details and then Create New Order. The next screen will list the Field and any Zones associated with the field. To use one of the zones, click it to bring it to map and begin Order.

ORDERS

How do I start an order?

Find the field in the sidebar and click the arrow icon , this will load the Field and Grower Overview details, scroll to bottom of area and choose **Create New Order**, the New Order window will open. **-or-** click the Create Order Icon .

- Populate the Applicator, Operation, Status (plan or released).
- Edit field if necessary.

- Add order notes.
- Edit App Start Date and App Window if needed.
- Add products by clicking the **Products** button. Or Program if one is needed.
- Choose Carrier.
- Select crop.
- Click **Save**

If need to edit Product, swipe right and **Delete** and re- add new product before Saving.

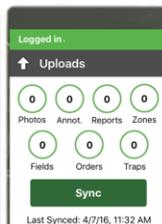

- The order is now finished, and will send to back into AgSync at the next app synchronization, which is approx. every ten minutes, depending on your connection.

How can I sync my orders?

Click  >>  >> **Uploads**

Clicking **Sync** under **Uploads** will update AgriSite and send any orders, photos, annotations, zones, fields, back to the AgSync system.

You will see any non-synced items by looking at the Upload area, the number in the circle indicates what is on the app and not synced back to AgSync.

How do I edit an order?

Find the field in the sidebar and click the arrow icon , this will load the Field and Grower Overview details and list any orders against the field.

Find the order you wish you edit. Only orders in Plan or Released status can be edited in this app.

- Click the order to select it.
- Click the Edit Order Icon 
- Make necessary edits and click **Save**

How do I release an order?

If you have a field in planned status you can release it so that it can be scheduled.

Find the field in the sidebar and click the arrow icon , this will load the Field and Grower Overview details and list any orders against the field.

Find the order you wish you release. Only orders in Planned status can be released in this app.

- Click the order to select it.
- Click the Edit Order Icon 
- Choose Release Order and click **Save**
-

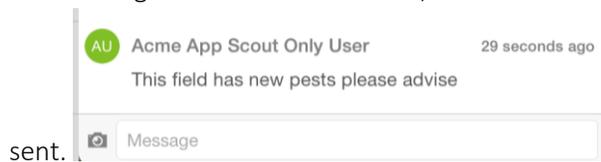

MESSAGING

The messaging feature allows scouts to communicate about field conditions instantly. The notes are categorized based on topic that the user sets up. Other agronomists and

scouts logged into the same account can communicate thru the app. Users can also send messages to cell phones if the receiver has messaging capability.

How do I send a message?

- 1.) Click the Message icon  at top of map.
- 2.) Choose Selected Field (to comment about field you are on. All Fields to find other fields from the list, or General to view the topics in that category.
- 3.) To message you must have a topic, if one is not available to choose, then click the **Add Topic** button.
- 4.) Add a topic name, and click **Next**. You can also choose the grower, farm, and field.
- 5.) Now you can begin your message, type in the lower text box and click **Send** when finished.
- 6.) You can also add images to the message by clicking the **Camera** icon.
- 7.) The message will indicate its status, whether it is Pending, Sent or the time it was

- 8.) You can send a message directly to another authorized user on your account. Type the "@" symbol in the message text field and you will be prompted with a list of users to send a direct message to. Pick the one you want to send the message to, then type the message. The receiver will be notified there is a message waiting for them via the message app alert icon. 
- 9.) You can also send the message to a cell phone that accepts messages. In the same line you type your message also type "@" sign followed by the phone number, then space and begin your message. Upon send the message will be sent to the recipient's phone. Example: @5555555555 Hi how are you

Recipients can respond via text message back to the AgriSite messaging feature.

***STANDARD DATA FEES AND TEXT MESSAGING RATES MAY APPLY BASED ON YOUR PLAN WITH YOUR MOBILE PHONE CARRIER.*

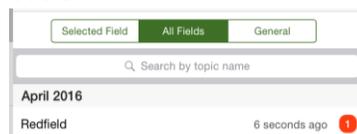

How do I know I have a message?

You will see alert icon for new messages: 

If a new message is sent to either you directly or your account group there will be an alert on the messaging icon.

How do I respond to a message?

If a new message was sent to the account, you will see a new message alert, on the field line. Click on it and you will be able to respond in the text box at the bottom.

If the message was texted to your phone, you can type the letter **s** followed by the message and click send. The message will show up in the messaging area in the AgriSite app.

How do I delete a message?

If you created the message topic you can swipe across the topic name and choose **Delete**.

Can I edit a topic?

You can edit a topic name by swiping the name and choosing **Edit**. Then you can change the topic name. Then click **Next**.

TROUBLESHOOT

My username isn't working.

Check capitalization on your password. Some devices automatically capitalize the first character. Sometimes it will be necessary to close down the app. To do this double click the home button and then swipe up on the app window to close it. If you continue to see problems check with your admin and confirm your permission.

I am missing farms / fields from my list.

The app will sync with the AgSync program upon login. But you may need to sync your app. again, click the  Map menu >>  >> Sync If syncing doesn't fix the missing field issue, go back to AgSync and confirm the field does exist and hasn't been removed. Also check spelling as if could be overlooked.

I need to add a new field.

New fields can be added thru the AgriSite app to your profile tree. **See:** How do I **add a new field** via Draw or GPS?

My weather isn't loading.

Weather is loaded based on your GPS location. You may have a signal strength issue. It is recommended to log out and sign back into the app to see if the weather will load with a new session.

How will I know I have the most recent version of AgriSite?

Check with the Google Play Store or the Apple App Store to see if there is an update available. Click to update if available.

COMPATIBILITY

The AgriSite app is a mobile device application. It can be downloaded and installed to Apple iOS iPad device
